SEO outreach specialist and team lead with 5+ years of experience across SEO content, on-page optimization, and link building, with focused outreach and link acquisition experience in the SaaS space. Currently leading a 3-person outreach team at factoHR while personally managing key partnerships, outreach automation systems, and strategic campaigns. Comfortable with both the psychology of cold outreach and the data side, from anchor text audits to LLM citation tracking. Experienced at building editor and webmaster relationships that produce consistent, high-quality placements month over month. Prospect response portfolio available on request.

PROFESSIONAL EXPERIENCE

factoHR (SaaS Platform)

June 2025 – Present

Outreach Team Lead (Promoted from SEO Outreach Specialist)

- Manage and mentor a team of three outreach specialists, training them on PBN detection, cold outreach psychology, negotiation tactics, and building editor relationships that create long-term placement leverage.
- Built custom AI workflow bots tailored to the team's outreach process, reducing time spent on repeatable tasks and freeing the team to focus on strategic work.
- Secured factoHR placements within competitors' own product listicles by building value-swap pitches that made inclusion a clear benefit for the editor, at no cost.
- Conducted a full link profile audit against the top 5 competitors to identify and correct anchor text distribution gaps, improving profile alignment with target page intent.
- Researched the exact sources being cited by major LLMs (ChatGPT, Perplexity, Gemini) for factoHR's commercial keywords, then executed a targeted campaign to get factoHR mentioned in those sources, expanding brand presence in AI-generated answers beyond traditional Google rankings.
- Planned and executed factoHR's first data-driven digital PR campaign; the initial execution did not meet targets, identified the gaps, and pivoted strategy with a revised angle currently in progress.
- Evaluated outreach tooling including Pitchbox and Buzzstream; implemented the more effective option to streamline prospecting and follow-up workflows.
- Built a fully end-to-end outreach automation in Gumloop that requires only a list of target domains as input. The system identifies the right contact at each domain, finds their verified email, drafts a personalized outreach email, sends it, logs the contact and status in the team's CRM, and automatically sends a follow-up after a set interval if there is no response. Inbound replies are then handed off for manual handling to take the collaboration forward. This system reduced outreach execution time by approximately 70% while maintaining the personalization quality of manual campaigns.

- Built a Google Sheets prospecting automation using Google's Programmable Search Engine and a contact-finding API, where inputting a list of domains automatically surfaces the right people to contact, finds their emails, and outputs a ready-to-use prospect list. Accuracy is approximately 70%, cutting manual prospecting time significantly.
- Supported link builders at reputed agencies serving major brands including Adobe, leveraging existing editor relationships to secure placements on sites whose editorial policies typically restrict links to blog content only, successfully placing service page links by building the contextual case for editors directly.
- Conducted [3-4] video calls with prospects who had no prior familiarity with link exchange collaborations, walking them through the mutual value proposition from scratch and converting every session into an active placement within factoHR's target listicle articles.
- Advised a colleague on a separate project targeting the agriculture market on outreach structure and pitch copy for guest post acquisition. They received positive replies within the first week and secured 10 guest post placements within a single month at no cost, applying the framework directly.

SEO Outreach Specialist

Jan, 2024 - May, 2025

- Built and maintained active relationships with 20+ genuine SaaS and service-based sites (e.g., SiteBulb, Cloudways) through a consistent value-first outreach approach, resulting in a reliable pipeline of editorial placements.
- Acquired an average of 15+ targeted, editorially placed backlinks per month with an average DR of 50+, contributing to 23% improvement in organic visibility for target commercial pages.
- Secured free featured placements for factoHR in aggregator platform listicles that typically charge significant listing fees, by building direct relationships with the editors.
- Negotiated and closed cross-promotional partnerships with direct competitors including HROne and Keka, resulting in reciprocal editorial placements and no cost listicle promotions - an arrangement that required building trust with editors who had a natural reason to say no.
- Met link acquisition targets in 10 out of 12 months, against targets of 20 links/month at a minimum DR of 30.
- Built a personal prompt library using Claude, ChatGPT, and Perplexity to accelerate time-consuming tasks including anchor text placement research, subject line ideation, and content outline preparation.
- Built a standalone email drafting automation for teams that prefer manual sending via Google Workspace or other outreach tools, which generates personalized email drafts based on a provided template and contact data, removing the bottleneck of writing individual emails from scratch.

- Built automated SERP scraping and link status tracking pipelines using Google Apps Script, enabling real-time link health monitoring without manual checking.

Creatofox Communications Pvt Ltd.

2023 – 2024

SEO Executive

- Re-optimized on-page SEO across client websites and published approximately 5 well-researched articles per month, contributing to a 30% increase in organic traffic within 3 months.
- Designed and launched high-converting landing pages for the 'GPBS 2024' business exhibition, and managed the event's email marketing via Brevo and Mailchimp, driving 15 confirmed stall bookings within the first month.
- Coordinated with the development team on website planning and build-out for multiple clients across the HVAC, agriculture, and related industries using WordPress.
- Contributed to overall SEO strategy for getbiodata.com, including site architecture planning, content strategy, and SEO content writing.
- Optimized existing and new product descriptions for e-commerce client joyablefoods.com to align content with the ideal customer profile.

Apanwar.com (WFH)

2022 – 2023

Content Marketer & Editor

- Produced approximately 30 targeted content pieces per month through keyword research, on-page optimization, content outlining, and custom media creation, improving topical coverage and SERP visibility.
- Managed social media content publishing across multiple platforms, increasing consistent brand exposure for the client.
- Acquired 10 to 15 contextual backlinks per month through SEO outreach and guest posting, contributing to measurable domain authority growth for client site coinotica.com.

Freelancing

2020 – 2022

SEO Content Writer

- Delivered SEO content for international clients across New Zealand, China, India, and the United States, producing approximately 15 articles per month across diverse formats including roundups, reviews, and comparisons.
- Served clients across digital marketing, cryptocurrency, travel, and consumer goods industries, adapting to varying tone, audience, and keyword requirements.

RECOGNITIONS

- Placed in the top 16 out of hundreds of participants globally in the Hunter.io Cold Email Pitch Writing Competition (2025), a publicly run competition by one of the most recognized brands in the outreach industry.
- Returned and placed in the top 64 out of 300+ participants in the Hunter.io Cold Email Pitch Writing Competition (2026), demonstrating consistent performance in competitive outreach copywriting at an international level.

SKILLS & TOOLS

- **Outreach Automation:** End-to-end Gumloop workflow automation (prospecting to CRM update to follow-up), Google Sheets + API prospecting automation, email drafting automation, Google Apps Script for SERP scraping and link monitoring
- **GEO & AI Search Visibility:** LLM citation research, identifying and targeting sources cited by ChatGPT, Perplexity, and Gemini for brand mention acquisition and exposure in AI-generated answers
- **Core SEO Skills:** Content strategy, SEO reporting and analysis, landing page creation, CRO analysis, basic technical SEO (Screaming Frog audits, CrUX data analysis, Core Web Vitals improvement)
- **Tools:** Ahrefs, SEMrush, Google Search Console, GA4, LemList, Screaming Frog, Gumloop, Google Apps Script, ChatGPT, Claude, Perplexity, Canva
- **Soft Skills:** Relationship building with editors, webmasters, link builders, and agency owners globally. Able to explain link building strategy to non-SEO stakeholders and get buy-in. Clear communicator within and across teams.

EDUCATION

Bachelor of Computer Application (BCA) | Shree V.J. Modha College | 2021

Graduated with Distinction, **CGPA: 8.94/10**
